

The disclosure of the names of fallen military operatives by Hamas and the Palestinian Islamic Jihad confirms the Amit Institute's Research findings on the double roles of "journalists" in the Gaza Strip

July 2, 2026

Overview¹

► Since the beginning of 2026 the military wings of Hamas and the Palestinian Islamic Jihad (PIJ) have regularly reported the names of hundreds of commanders and operatives killed during the war in the Gaza Strip since October 7, 2023, including after the ceasefire which went into effect in October 2025.

► **The publication of the names provides official organizational confirmation that individuals who during the war were allegedly "journalists" and "media personnel" in fact belonged to the military media units of the military wings of Hamas and the PIJ or to other units within the other organizations.**

► The Intelligence and Terrorism Information Center (now the Amit Intelligence and Terrorism Research Institute) published two comprehensive studies, one in February 2024 and the other December 2025, examining the identities of 266 Palestinians killed in the Gaza Strip who were alleged to have been journalists and media personnel. The findings, based on open-source material, showed that about 60% belonged to the military wings or were affiliated with terrorist organizations, primarily Hamas and the PIJ.

► **The current study shows that commanders and operatives whose names have been disclosed by Hamas and the PIJ in recent months had already appeared in the Information Center's special studies as individuals claimed to have been media personnel but who in fact unquestionably belonged to the military wings of the two organizations.**

► **That is further evidence that the terrorist organizations in the Gaza Strip manipulate the publication of the names of those killed in the Strip by portraying some of them as "innocent civilians" despite their obvious involvement in military activity and terrorism against Israel.**

Background

► In recent months, Hamas and the PIJ have begun frequently publishing the names and positions of hundreds of commanders and operatives who were killed during the war in the Gaza Strip, from the October 7, 2023 invasion and massacre onward, including after the ceasefire which went into effect in October 2025. Between January 2026 and the end of June 2026, the Izz al-Din al-Qassam Brigades, Hamas' military wing, disclosed the names of more than 700 "martyrs," while the Jerusalem Brigades, the PIJ's military wing, published more than 540 names (Izz al-Din al-Qassam Brigades, Jerusalem Brigades and Aqmar al-Tufan [Flood Moons] Telegram channels,² January 1-June 30, 2026).

► **The publication of the names provided formal organizational confirmation that some of their military operatives led double lives, which helped conceal their terrorist affiliation. The most prominent cases involved individuals who during the war were represented as journalists and media personnel, while the official notices proved they had been in the media units of the military wings or belonged to other terrorist units.**

► **The Intelligence and Terrorism Information Center (now the Amit Intelligence and Terrorism Research Institute) February 2024 and December 2025 comprehensive studies examined the identities of Palestinians killed in the Gaza Strip whom the Hamas government media information office in the Gaza Strip, as well as Palestinian media outlets and social media channels, had represented as journalists and media personnel, claims that were at times repeated by international media outlets and journalist protection organizations. The findings, based on open-source material, showed that about 60% of the 266 individuals examined were members of or affiliated with the military wings of the terrorist organizations, primarily Hamas and the PIJ.³**

► **The current study presents the identities of commanders and operatives whose deaths were announced by Hamas and the PIJ in recent months and whom the Intelligence and Terrorism Information Center's previous studies had already confirmed to have belonged**

to the military wings of the terrorist organizations in addition to their media activities. The study also includes media personnel whom the Information Center's studies identified as being affiliated with Hamas or the PIJ and for whom there is now official confirmation that they were military operatives.

► The New York City-based Committee to Protect Journalists (CPJ) announced it was conducting a comprehensive review of its database of journalists killed during the war in the Gaza Strip after Hamas and the PIJ issued death notices for fallen military operatives who had been classified by the committee as "journalists." The committee stated it had removed eight names from the database after it determined that they belonged to Hamas or the PIJ and that 12 additional names had been removed for "other reasons." The committee's Executive Director, Jodie Ginsberg, condemned the false representation of combatants as media personnel and the improper use of the "press" designation in the field (Committee to Protect Journalists website, June 25, 2026).
