Item 5(f) of the agenda
(GOV/2026/38))

Implementation of the NPT Safeguards Agreement and relevant provisions of United Nations Security Council resolutions in the Islamic Republic of Iran

Resolution adopted on 10 June 2026 during the 1812th session

The Board of Governors,¹

- (a) Commending the continued professional, independent and impartial efforts of the Agency and Director General, in implementing Iran's Treaty on the Non-Proliferation of Nuclear Weapons (NPT)-related Safeguards Agreement, INFCIRC/214, ("Safeguards Agreement") to resolve the long outstanding safeguards issues in Iran, and to undertake verification activities as required by the relevant resolutions of the Board of Governors and the United Nations Security Council (UNSC),
- (b) Emphasizing the essential and independent role of the Agency in verifying compliance with safeguards obligations and in providing objective technical reporting to the Board and, as appropriate, in parallel to the UNSC,
- (c) Recalling the resolution adopted by the Board on 12 June 2025 contained in GOV/2025/38, which found that Iran's many failures to uphold its obligations since 2019 to provide the Agency with full and timely cooperation regarding undeclared nuclear material and activities at multiple undeclared locations in Iran, as detailed in GOV/2025/25, constitutes non-compliance with its obligations under its Safeguards Agreement with the Agency in the context of Article XII.C of the Agency's Statute,
- (d) Noting the Safeguards Implementation Report for 2025, contained in GOV/2026/24, in which the Director General reported that the Agency is unable to draw a conclusion regarding

¹ The resolution was adopted with 21 in favour, 3 against and 10 abstentions.

previously declared nuclear material in Iran, including a large amount of high enriched uranium, that it has been unable to verify,

(e) Further noting with grave concern the Director General's report, contained in GOV/2026/33, which states that the Agency's lack of access to verify the previously declared HEU and LEU, for nearly a year — which is long overdue according to standard safeguards practice — is a matter of proliferation concern and of compliance with Iran's Safeguards Agreement,

(f) Underscoring Iran's obligation, as set forth in UNSC resolution 1737 (2006), to suspend all enrichment-related and reprocessing activities, including research and development, as well as work on all heavy water-related projects, and to provide such access and cooperation as the IAEA requests to be able to verify the suspension, and Iran's obligation, as set forth in UNSC resolution 1929 (2010) to comply fully and without qualification with its Safeguards Agreement, including through the application of modified Code 3.1 of the Subsidiary Arrangements to its Safeguards Agreement, and

(g) Expressing continuing support for a diplomatic solution and calling on Iran to engage seriously and without preconditions in talks aimed at building international confidence in the exclusively peaceful nature of Iran's nuclear programme,

1. Reaffirms its strong support for the Director General and the Secretariat in their efforts to implement fully Iran's Safeguards Agreement with the Agency as well as this and previous resolutions and to report any significant developments to the Board, as appropriate;

2. Recalls that Iran's many failures to provide the Agency with full and timely cooperation regarding undeclared nuclear material and activities at multiple undeclared locations in Iran, as detailed in GOV/2025/25, constitute non-compliance with its obligations under its Safeguards Agreement with the Agency in the context of Article XII.C of the Agency's Statute;

3. Deeply regrets Iran's continued failure to remedy its non-compliance over the past 12 months, including its failure to provide the IAEA with requested information and access needed to verify previously declared nuclear material that the Agency has been unable to verify for one year;

4. Further reiterates that, consistent with Article 19 of Iran's Safeguards Agreement, the Agency is not able to verify that there has been no diversion of nuclear material required to be safeguarded under the Agreement to nuclear weapons or other nuclear explosive devices;

5. Affirms that it is essential and urgent in order to ensure verification of the non-diversion of nuclear material that Iran act to fulfil its legal obligations and take the following actions without delay:

- i. Provide the Agency with complete information on nuclear material inventories and design information for facilities and
- ii. Grant the Agency all access it requires to verify this information;

6. Stresses that Iran's Safeguards Agreement cannot be unilaterally amended or suspended;

7. Further stresses Iran's legal obligation to implement modified Code 3.1, and provide all necessary design and preliminary design information to the Agency;

8. Reiterates its call upon Iran to urgently remedy its non-compliance with its Safeguards Agreement by taking all steps deemed necessary by the Agency and the Board, so that the Director General can provide the necessary assurances regarding the correctness and completeness of Iran's declarations pursuant to its Safeguards Agreement;

9. Requests the Director General to report on the implementation of this and previous resolutions in his report to the next regular session of the Board, for its consideration;
10. Underlines its support for a diplomatic solution to the challenges posed by the Iranian nuclear programme and its implications for regional peace and stability;
11. Reiterates that the Board will stand ready to take further action, including to address the timing and content of the report required under Article XII.C of the Agency's Statute for consideration by the United Nations Security Council as provided for by the Board's resolution of 12 June 2025 contained in GOV/2025/38; and
12. Decides to remain seized of the matter.
